

## THE BUILD LOOP

# Never Let the Builder Wait.

Every minute Codex is building, the product is moving toward V1.

The next prompt should already be ready when Codex finishes. Repeat until V1 is functionally complete.

# THE IMPROVEMENT LOOP

Testing and building repeat until the  
product is shippable.

**Thinking is never on  
the critical path.**

## THE BUILDER'S RULES

1. Keep the Builder Building
2. Function Before Beauty
3. Think While the Builder Works
4. Problems Become Milestones
5. Ship Quality, Not Perfection

Think while Codex builds. Think while you are  
away from your computer. Always have the  
next prompt ready.
