

Christopher's Product Test Data

Copy-ready information for testing every major calculation and setup choice

Everything in this guide is fictional

The names, addresses, businesses, and events are made up. Use these values instead of real personal, customer, or business information.

How to use this guide

- 1 Enter one Business Defaults profile.
- 2 Save it and make sure it remains after closing and reopening the app.
- 3 Create the matching Event shown in this guide.
- 4 Compare the Event Analysis totals with the Expected Results table.
- 5 Keep the event so you can test Saved Events and Scenario Comparison.
- 6 When you are ready for the next profile, save a backup first, then replace the Defaults with the next profile.

Important input rule

When a field is optional and this guide says "Blank," leave it empty. Enter percentages as the number shown: enter 30 for 30%. Money should use no more than two decimal places.

Business Defaults profiles

Profile A - Harbor Hearth Truck

Main normal-use profile. Tests percentage food cost, two employee rows, card processing, travel, and a dollar-profit target.

Field	Enter this value
Business name	Harbor Hearth Truck
Average order sale amount	14.00
Food method	Percentage of sales
Food and packaging cost percentage	28.00
Sales paid by card	75.00%
Card-processing percentage	2.90%
Profit target	Minimum profit amount
Minimum profit amount	500.00
Owner labor pay	150.00
Travel cost	60.00
Employee labor row 1	20.00 per hour / 12.00 combined hours
Employee labor row 2	26.00 per hour / 4.00 combined hours

Profile B - Little Lantern Eats

Small owner-led operation. Tests average cost per order, one employee row, and blank optional owner/travel values.

Field	Enter this value
Business name	Little Lantern Eats
Average order sale amount	10.00
Food method	Average cost per order
Average food and packaging cost per order	3.25
Sales paid by card	40.00%
Card-processing percentage	2.50%
Profit target	Minimum profit amount
Minimum profit amount	100.00
Owner labor pay	Leave blank
Travel cost	Leave blank
Employee labor row 1	18.00 per hour / 6.00 combined hours

Profile C - Copper Kettle Mobile Kitchen

High-overhead operation. Tests total food cost per event, very large labor values, and a profit-margin target.

Field	Enter this value
Business name	Copper Kettle Mobile Kitchen
Average order sale amount	20.00
Food method	Typical total per event
Typical food and packaging total	2400.00
Sales paid by card	95.00%
Card-processing percentage	3.50%
Profit target	Minimum profit margin
Minimum profit margin	20.00%
Owner labor pay	800.00
Travel cost	300.00
Employee labor row 1	25.00 per hour / 80.00 combined hours
Employee labor row 2	35.00 per hour / 20.00 combined hours

Profile D - Meadowline Street Food

Margin-focused operation with ordinary costs and one employee row.

Field	Enter this value
Business name	Meadowline Street Food
Average order sale amount	12.50
Food method	Percentage of sales
Food and packaging cost percentage	30.00
Sales paid by card	80.00%
Card-processing percentage	3.00%
Profit target	Minimum profit margin
Minimum profit margin	12.00%
Owner labor pay	125.00
Travel cost	50.00
Employee labor row 1	20.00 per hour / 10.00 combined hours

Profile E - Juniper Junction Grill

Dollar-profit-focused operation with two employee rows and average food cost per order.

Field	Enter this value
Business name	Juniper Junction Grill
Average order sale amount	16.00
Food method	Average cost per order
Average food and packaging cost per order	4.50
Sales paid by card	60.00%
Card-processing percentage	2.75%
Profit target	Minimum profit amount
Minimum profit amount	750.00
Owner labor pay	200.00
Travel cost	90.00
Employee labor row 1	22.00 per hour / 16.00 combined hours
Employee labor row 2	30.00 per hour / 5.00 combined hours

Complete event entries

Event A1 - Harbor Lights Market

Use this event after saving Profile A. Values shown as "Blank" should be left empty.

Field	Enter this value
Event name	Harbor Lights Market
Date	September 12, 2026

Vendor fee / organizer commission / fixed card fee	100.00 / 10.00% / 0.50
Profit target	Minimum profit amount: 100.00
Miscellaneous cost	Event operating costs: 100.00

Expected results

After analyzing each event, compare the main results below. Small display differences caused only by labels or comma formatting are fine. The numbers and recommendation should match.

Event	Revenue	Total cost	Profit	Margin	Break-even sales / customers	Recommendation	Warnings
B1 - Lantern Lunch Stop	\$2,000.00	\$625.00	\$1,375.00	68.75%	\$625.00 / 63	Worth accepting	Custom sales assumption
A1 - Harbor Lights Market	\$1,000.00	\$894.00	\$106.00	10.60%	\$894.00 / 90	Borderline	Below the \$300 target
C1 - Copper Expo Pavilion	\$12,000.00	\$12,870.00	-\$870.00	-7.25%	\$12,870.00 / 644	Not worth accepting	Loss; below target; buyers below break-even
D1 - Rainy Meadow Fair	\$887.50	\$849.68	\$37.83	4.26%	\$849.68 / 85	Borderline	Below target
E1 - Junction Cost Test	\$500.00	\$1,220.00	-\$720.00	-144%	\$1,220.00 / 122	Not worth accepting	Loss; below target; buyer shortfalls; custom sales

Quick changes to test Scenario saving and recommendations

Starting event	Change	Expected numbers	Expected result
Harbor Lights Market	Change minimum profit target to 100.00	\$106.00 profit	Worth accepting
Harbor Lights Market	Change minimum profit target to 107.00	\$106.00 profit	Borderline - below target
Harbor Lights Market	Change target to minimum margin of 10.00%	10.60% margin	Worth accepting
Harbor Lights Market	Change target to minimum margin of 11.00%	10.60% margin	Borderline - below target
Harbor Lights Market	Change vendor fee to 206.00 and target amount to 0.00	\$0.00 profit / 0% margin	Worth accepting at exact break-even
Harbor Lights Market	Change food method to Total for this event: 475.00	-\$69.00 profit / -6.90%	Not worth accepting
Harbor Lights Market	Change attendance to 0, buyer rate to 0, and target to 10% margin	-\$500.00 profit; margin unavailable	Not worth accepting

Rounding check

Use a new disposable event or Scenario. Copy all Harbor Lights Market values first, then make every change below.

Field	Value
Attendance	3
Food buyer percentage	33.33%
Average order amount	12.34
Weather	Minor concern
Protection	Fully indoors
Food method	Average cost per order: 3.33
Card sales / processing / fixed fee	33.33% / 2.99% / 0.15
Vendor fee / commission	0 / 0%
Labor / owner / travel / extras	Remove or enter none
Profit target	Minimum profit amount: 1.00

Expected rounding result

Revenue \$12.25; total cost \$3.48; profit \$8.77; margin 71.61%; break-even \$3.48 / 1 customer; recommendation Worth accepting. The buyer summary may display 0 whole buyers because the exact estimate is just under one.

Wrong data to try

Try only a few of these on each kind of field. The goal is to see whether the app explains the problem clearly and keeps the good information you already entered.

Field or action	Try this	What should happen
Required name or location	Leave blank; enter only spaces; paste a very long name	The app should explain that the field is required and should not partially save.
Whole numbers	Enter -1, 1.5, or letters in attendance/competitor fields	The app should reject invalid values. Zero should be accepted where it makes sense.
Percentages	Enter -0.01, 100.01, letters, or 2.999	The app should reject out-of-range values and too many decimal places.
Money	Enter -0.01, letters, or 12.345	The app should reject invalid money but keep the other correct fields.
Food method	Choose another method but do not click Use this method	The old confirmed method should remain active until the new method is confirmed.

Field or action	Try this	What should happen
Custom sales	Choose custom sales and leave the amount blank, then switch back	The amount is required only while custom sales is selected and should stop applying after switching back.
Labor row	Enter only the rate or only the hours	The app should require both values and keep other rows.
Miscellaneous cost	Enter a name without an amount, or an amount without a name	The app should require both parts.
Profit target	Choose a target type but leave its number blank, then switch types	Only the active target should be required and used.
Rename	Try a blank name and a duplicate Scenario name	Nothing should be renamed until the name is valid.
Clear Everything	Enter the wrong confirmation phrase first	Nothing should be deleted until the exact phrase is entered.

Suggested saved events for comparison

- [] Keep Harbor Lights Market as the Original estimate.
- [] Save the 100.00 target version as "Target pass."
- [] Save the 107.00 target version as "Target fail."
- [] Save the 11.00% margin version as "Margin target."
- [] Save the 475.00 total food-cost version as "Higher food cost."

Use these Scenarios to test selecting two, three, and four comparisons, changing the baseline, showing only differences, keeping a selected Scenario, and opening a Scenario from the Comparison screen.

When a number does not match

Take a screenshot of the Event Analysis screen and write down the Event or Scenario name. Do not try to fix the math yourself. Deidra only needs to know what you entered, what the guide expected, and what the app showed.
